Application: Operations Analyst

Dear Ms. Whitfield,

I am applying for the Operations Analyst role. For three years I have built the dashboards our depot uses every morning to plan 40 delivery routes, and I cut late deliveries from 9% to 4%.

Your ad mentions Power BI, SQL and process improvement. I use all three every week, and I enjoy explaining the numbers to dispatch teams so that they actually change how we work.

I would be glad to show you one of my dashboards in an interview.

Kind regards,

Alex Morgan
